

Component Specification Request Checklist

LED HUB Adapter Board

The HUB board organizes module data connections. Its pinout and receiving-card interface must be verified, even when the connectors appear identical.

Use this page to prepare a model-specific inquiry; it is not a product datasheet.

01 APPLICATION

Cabinet assembly, receiver-card integration and interface repair.

02 CONFIRM BEFORE ORDERING

- ☐ **Receiver interface** Match the card socket and board format
- ☐ **Module outputs** Confirm connector number and arrangement
- ☐ **Pin mapping** Compare against the original wiring diagram
- ☐ **Ribbon direction** Record keying and cable orientation

03 SUPPORTING EVIDENCE

- Receiving-card socket and existing HUB board photos.
- Module output count, connector arrangement and pin map.
- Ribbon keying, orientation and a wiring diagram if available.

04 REQUEST RECORD

Existing part / model	Quantity needed
Display / cabinet reference	Project / site

Mark the cable direction and keep a connector photo with the service record.
