Component Specification Request Checklist

LED Sending Box

The sender sits between the video source and the screen network. Source format, output loading and receiver compatibility define the selection.

Use this page to prepare a model-specific inquiry; it is not a product datasheet.

01 APPLICATION

Fixed installations, service replacements and control-room video distribution.

02 CONFIRM BEFORE ORDERING

☐ **Video input**	Confirm source type and required canvas
☐ **Output plan**	Calculate pixels per port and cable route
☐ **Receiver family**	Verify compatibility with installed cards
☐ **Control files**	Store the approved mapping and backup

03 SUPPORTING EVIDENCE

- Video source type, expected canvas and input connection.
- Cabinet order, pixels per output port and cable route.
- Installed receiver family and approved configuration backup.

04 REQUEST RECORD

Existing part / model

Quantity needed

Display / cabinet reference

Project / site

Document the screen mapping and retain a copy of the approved configuration for future support.
